

## EZ DOCK PRODUCTS - ANCHORINGS

### Anchoring

Once you have decided on your EZ Dock, you will need to select an anchoring system to work with your existing piling or with your new installation. Our wide variety of anchoring components can accommodate most water conditions and bottoms (deep, shallow, rough, muddy or sandy), and are simple to install. EZ Dock anchoring products are made from long-lasting, durable materials that can withstand normal to heavy-duty demands. We can help you select the anchoring system that is right for your location.
